

Stress patterns of verbs, nouns and adjectives

STRESS PATTERN CARDS

VOCABULARY CARDS

psychology	depress	science	support
psychologist	depression	scientific	supportive
anxiety	depressing	scientist	supporter
anxious	depressed	suffering	involvement
awarenesss	envy	suffer	involve
aware	envious	sufferer	involved

Instructions and Answer key

You will need: one set of *Stress pattern cards* and one set of *Vocabulary cards* per pair

- Students work in pairs. Give each pair a set of *Stress pattern cards* and ask them to spread them out face up.
- Give each pair a set of *Vocabulary cards* face down in a pile. Student A turns over a card and places it under the correct stress pattern card, saying the word correctly at the same time. Do an example with the whole class.
- If Student B thinks his/her partner is correct, then Student A gets one point. If Student B thinks the card is in the wrong place, he/she can challenge Student A. Student B can then place the word under another stress pattern card and, if correct, wins a bonus point.
- If students cannot agree, the teacher adjudicates (see Answer key). If neither student was correct, the vocabulary card is returned to the bottom of the pile.
- Students continue to take turns. The student with the most points at the end is the winner.
