Introduction

Idioms and Phrasal Verbs

Idioms and Phrasal Verbs forms part of the *Oxford Word Skills* vocabulary series. It is a series of two books for students to learn, practise, and revise everyday English idioms and phrasal verbs.

Intermediate:	intermediate and upper-intermediate (CEF levels B1 and B2)
Advanced:	advanced (CEF levels C1 and C2)

There are over 1,000 new idioms and phrasal verbs in each level, and all of the material can be used in the classroom or for self-study.

How are the books organized?

Each book contains 60 units of vocabulary presentation and practice. Units are one to three pages long, depending on the topic. New vocabulary is presented in manageable quantities for learners, with practice exercises following immediately, usually on the same page. The units are grouped together thematically in modules of four to nine units. At the end of each module there are further practice exercises in the review units, so that learners can revise and test themselves on the vocabulary learned.

At the back of each book you will find:

- an answer key for all the exercises
- an answer key for the review units
- a list of the spotlight boxes
- a list of all the idioms and phrasal verbs taught, with a unit reference to where each item appears
- a separate list of key words with unit references
- a page featuring the histories behind some of the idioms in the book (👁️ look on the website www.oup.com/elt/wordskills for more).

What are idioms and phrasal verbs? Why teach them together?

Idioms are usually defined as groups of words whose meaning is different from the individual words. So, *under the weather* has nothing to do with the literal meaning of ‘the weather’; it means ‘feeling ill’. If you *sweep something under the carpet*, you try to keep something secret; and if you *put someone in the picture*, you give them the information they need to understand a situation. As these examples illustrate, in some idioms the meaning can be almost impossible to guess out of context, while others are more transparent.

Phrasal verbs consist of two and occasionally three words: a base verb and at least one particle (preposition or adverb). Many phrasal verbs are idiomatic: in other words, the meaning of the verb and particle is different from the base verb on its own. For example, the meanings of *give up* and *give in* are quite different from the meaning of *give*. As with idioms, some phrasal verbs are more transparent than others, e.g. *stand up* and the most

common meaning of *stand* are very similar in meaning, as are *sit down* and *sit*. In other words, phrasal verbs can be seen as a type of idiom, although they are often singled out for specific attention in language-teaching materials.

Putting idioms and phrasal verbs together has a linguistic rationale, but perhaps an even greater pedagogic one. A relatively short passage of text – a practical necessity in most language-teaching materials – does not normally produce nine or ten naturally occurring phrasal verbs, but it can easily yield that number if the target language includes both phrasal verbs and idioms. This makes it easier to present the target language in continuous text rather than disconnected sentences, and gives learners more opportunity to see the expressions being used naturally, and to use them themselves in a realistic way.

Which idioms and phrasal verbs are included?

When people think of idioms, they tend to think of the more imaginative and colourful examples: *kick the bucket*, *have a bone to pick with someone*, *full of beans*, *be barking up the wrong tree*, etc. These vivid expressions can be extremely difficult to understand, so they are often the ones that teachers are called upon to explain in the classroom. It is also undeniably true that idioms – especially the more vivid ones – hold a particular fascination for some learners. However, there are thousands of idioms, less exotic and often more transparent than the ones above, which are of a higher frequency and probably greater value to the vast majority of learners. Here are some typical examples:

bear sth in mind, *get your own way*, *by far*, *come in handy*, *fair enough*, *a happy medium*, *have your doubts about sth*, *hours on end*, *I thought as much*, *if all else fails*, *in all probability*, *last but not least*, *leave it at that*, *life's too short*, *little by little*, *no wonder*, *not necessarily*, *odds and ends*, *on the surface*, *play a part in sth*, *rightly or wrongly*, *so what?*, *take it personally*, *that's life*, *the sooner the better*, *to put it mildly*, *two years running*, *use your head*, *you'll be lucky*.

Some of these will appear so mundane that they often pass unnoticed as idioms. In some cases the meaning may be quite easy to guess, especially in context, but the same concept may be expressed in a different way in the learner's mother tongue, so these expressions need to be learnt, and are equally deserving of our attention.

In both books, we have concentrated on high-frequency idioms and phrasal verbs which are likely to be of greatest value to learners in everyday English. To this end, you will find some vivid and colourful examples, but the majority are closer to the list above.

One final note on selection. Dictionaries do not always agree on what constitutes an idiom: *hold the line* is listed as an idiom in one dictionary, but a collocation in another. The same is true for *under the influence*, *be on sb's side*, *at risk from sth*, *come to no harm*, etc. Equally, a phrase listed as an idiom in one dictionary may have a separate headword entry in another, e.g. *lost cause*, *lame duck*. Our criterion for inclusion in this series is that an item has to be listed as an idiom in at least one of the following ELT dictionaries (and they are almost always in more than one):

- Oxford Advanced Learner's Dictionary*
- Oxford Wordpower Dictionary*
- Oxford Idioms Dictionary for learners of English*
- Longman Dictionary of Contemporary English*
- Macmillan English Dictionary for Advanced Learners*
- Cambridge Advanced Learner's Dictionary*
- Collins COBUILD Advanced Learner's English Dictionary*

How can teachers use the material in the classroom?

New idioms and phrasal verbs are presented through different types of text, including dialogues, tables, and visuals. The meaning of the new vocabulary is explained in an accompanying glossary unless it is illustrated in visuals or diagrams. Important or additional information is included in the 'spotlight' boxes.

Here is a procedure you could follow:

- Students study the presentation for five to ten minutes (longer if necessary).
- You answer any queries the students may have about the items, and provide a pronunciation model of the items for your students to repeat.
- Students do the first exercise, which they can check for themselves using the answer key, or you can go over the answers with the whole class.
- When you are satisfied, you can ask students to go on to further exercises, while you monitor them as they work individually or in pairs, and assist where necessary.
- When they have completed the written exercises, students can often test themselves on the new vocabulary. The material has been designed so that students can cover the new vocabulary and look at the meaning, or vice-versa. This is a simple, quick, and easy way for learners to test themselves over and over again, so there is no pressure on you to keep searching for different exercises.
- After a period of time has elapsed, perhaps a couple of days or a week, you can use the review exercises for further consolidation and testing.

- You will often notice the heading ABOUT YOU or ABOUT YOUR COUNTRY. This indicates a personalized exercise which gives learners an opportunity to use the new vocabulary within the context of their own lives. Students can write answers to these in their notebooks, but they make ideal pair-work activities for learners to practise their spoken English while using the new vocabulary. If you use these as speaking activities,

students could then write their answers (or their partner’s answers) as follow-up.

To extend page 162, which gives the histories behind a number of idioms in this book, go to the website **www.oup.com/elt/wordskills** to find a regular feature. You and your students should find this interesting.

How can students study alone?

- Choose the topics that interest you. You don’t need to do the units in any particular order.
- Each page will probably take you about 20–25 minutes. Firstly, spend at least ten minutes studying the presentation, which may be a text, a dialogue, a table, etc. Use the glossaries to help you understand the meaning of new items. Practise saying the idioms and phrasal verbs a few times to help you remember them.
- Keep a notebook where you can write down the new idioms and phrasal verbs with the meaning and an example sentence to help you remember them. If you are using a bilingual dictionary, you could also add a translation.
- Do the exercises in pencil: then you can rub them out, and do them again in a few days’ time. Check your answers in the answer key on pages 163–79. At the end of many units you will find a section called ABOUT YOU or ABOUT YOUR COUNTRY. This gives you an opportunity to use the vocabulary more freely to write in your notebook about yourself, your country, etc.
- You can usually **test yourself** on the new vocabulary. Look at the idioms and phrasal verbs in the glossaries and tables, and cover the meanings. See if you can remember the meanings. You can do this when you have finished the exercises, or several days later as a way of revising the idioms and phrasal verbs.
- You can use the further practice exercises in the review sections which follow each module. Either do them immediately after a unit, or do them a few days later as a form of revision.
- We think it is probably better for you to do one unit at a time on a regular basis, e.g. two or three times a week, rather than study irregularly but try to do a lot of units at the same time.
- If you haven’t got a good dictionary in English, we recommend *The Oxford Advanced Learner’s Dictionary*. You may also be interested in two specialist dictionaries: *Oxford Idioms Dictionary for learners of English* and *Oxford Phrasal Verbs Dictionary for learners of English*.
-  Go to the website **www.oup.com/elt/wordskills** to find a regular feature on the origins of a number of idioms in the book.

1 I can understand idioms

Idioms are fixed or semi-fixed phrases, and many of them are difficult to understand.

<i>The situation is improving, but we're not out of the woods yet.</i>	not out of the woods INF not yet free from difficulties or problems.
<i>I'll probably take a back seat and let Marco do most of the work.</i>	take a back seat deliberately become less actively involved in sth, and stop trying to control things.
<i>My heart sank when I saw the hotel room they'd given us.</i>	my heart sank used to tell sb that you suddenly felt sad or worried about sth.

Idioms are particularly common in spoken English. Some are easier to understand, but you will need to learn many of them as fixed phrases.

- 'It's an expensive restaurant. **Having said that**, the food is very good.'
- '... and then **the next thing I knew**, the cat had jumped out of the window ...'
- 'Pete and Sue have split up. ~ Mmm. **I thought as much**.'

Glossary

having said that	used to say that sth is true despite what you have just said.
the next thing I knew	used to say that sth happened very quickly and unexpectedly.
I thought as much	used to say you are not surprised that sth is true.

The glossaries and tables in this book will also show you that some idioms have a choice of words or a particular style. (See Units 49–54 for more on style.)

Idiom	Meaning	Special feature
<i>Will they lose? ~ More than likely. She can't do the gardening. ~ I'd be more than happy to help her.</i>	very likely. very happy.	a choice of words with different meanings: more than likely/happy/ready , etc.
<i>I'd be hard pressed to name all the countries in Europe.</i>	find it very difficult to do sth.	a choice of synonyms: be hard pressed/pushed/put to do sth.
<i>I think Ann got out of bed on the wrong side this morning.</i>	used to say that sb is in a bad mood.	the style is HUMOROUS.

Most of all, you need to be aware that idioms **come in all shapes and sizes** (= are of many different types), and they are not always obvious. When you read a text, look for possible idioms and check in a good dictionary to see if you are right.

I asked Sue about her essay and she just ignored me.

~ Yes, I think it's a bit of **a sore point** because she got a very low mark for it.

Oh dear. I **put my foot in it**, then.

~ No, **it serves her right**. She **didn't do a stroke of work**, so don't **take it personally**. She'll just have to work harder next time.

Glossary

a sore point	sth that makes you upset, angry, or embarrassed when sb mentions it.
put your foot in it	INF accidentally say sth that embarrasses, upsets, or annoys sb.
it serves sb right (for doing sth)	used to say that you think sb deserves sth unpleasant that happens to them.
not do a stroke of work	INF not do any work at all.
take it/sth personally	feel that a failure is your fault, or feel offended by sth/sb.

3 Look at the idioms in bold in these sentences, then use a good dictionary to find out what special features they have (choice of words, grammar, or style). Write at the end, or in your notebook.

- He **landed on his feet** with that job at the bank. *Could also be 'fall on your feet'.*

4 Read the text then answer the questions.

On the first morning we met our instructor, Kevin, and he made it clear we were going to hit the ground running. We had to build a raft and then sail it down a river; he said it would sort out the sheep from the goats. That made me feel very uneasy, but I put a brave face on it. The next day was even worse – abseiling down a cliff – but I was determined not to throw in the towel. By the third day I was beginning to realize we were all in the same boat, and probably all feeling equally vulnerable. That made me feel much better, and by the end of the week I'd also realized that Kevin's bark was worse than his bite. I survived.

- 1 The text contains six idiomatic phrases that are being used figuratively. Underline them.
- 2 Match the phrases with these explanations:
 - a admit you've been defeated and stop trying.
 - b distinguish the able people from the less able people.
 - c he is not as aggressive as he sounds.
 - d start doing something and proceed quickly and successfully.
 - e be in the same difficult situation.
 - f pretend you feel confident and happy when you do not.

2 Idiom and metaphor

Many idioms begin as phrases with a literal meaning, which then develop a figurative/metaphorical meaning. For example, somebody can **be in the driving seat** (of a vehicle), which means they are literally in control of the vehicle. When we use the phrase metaphorically, we mean the person is in control of a situation. Other examples are:

They've decided to wait for the dust to settle.	Literal meaning: 'wait to be able to see more clearly'. Metaphorical meaning: 'wait for an unsettled situation to become calm'.
I'm sure we're on the right track.	Literal meaning: 'on the right road, path, or track'. Metaphorical meaning: 'acting in a way that will bring a desired result'. OPP on the wrong track.

Metaphors from particular areas of activity can sometimes describe particular thoughts, ideas, etc. For example, boxing expressions often describe people in difficult situations:

The minister is *on the ropes* now.

INF = having serious problems and likely to fail.

The boss found himself *in a tight corner*.

INF = in a difficult situation. SYN in a tight spot INF.

Idioms derived from card games are sometimes connected to keeping plans and ideas hidden.

She plays her cards close to her chest.

= keeps her plans or ideas secret.

I think he's got something up his sleeve.

= has a plan or idea he will keep secret until needed.

With some idioms, the literal meaning has become lost over time, and we only use the metaphorical meaning. For example, in the past a blacksmith was a person who made things out of iron. He had to **strike** (= hit) the iron while it was still hot in order to bend it into the shape he wanted. From this we get the idiom **strike while the iron is hot** = make use of an opportunity immediately because now is the best time to do it.

The idiom **have a chip on your shoulder** (= be sensitive about or feel offended by sth, as a result of sth that happened in your past) comes from a 19th-century American custom. If a boy wanted to fight, he would put a piece of wood on his shoulder; he fought against the first person who knocked the piece of wood off.

You can find the histories behind some of the idioms in this book on page 162 (look on the website www.oup.com/elt/wordskills for more).

1 Complete the sentences.

- 1 It'll take a while to finalize the plans, but I think we're on the right now.
- 2 Katrina hasn't told us everything. I think she's still got something up her
- 3 That boy has a on his shoulder about his height. I don't know why it bothers him.
- 4 I think we should wait for the to settle before we decide what to do.
- 5 After the recent criticism, I think she's in quite a tight
- 6 I don't understand why he always plays his cards so close to his

2 Rephrase these situations using a suitable idiom.

- ▶ She's got a secret plan. *She's got something up her sleeve.*
- 1 She's in control of the situation.
- 2 I'm sure we're doing the right things.
- 3 Now is the time to do it; don't wait.
- 4 Wait until the situation is much clearer.
- 5 The company is doing badly and is likely to fail.
- 6 She's in a difficult situation right now.
- 7 He always seems to think the world has treated him unfairly.
- 8 She always keeps her ideas secret.

3 What is the common idea linking the idioms with 'head' and the common idea linking the idioms with 'heart'? And what is the meaning of the final idiom?

- have your head screwed on
- lose your head
- use your head
- break sb's heart
- take sth to heart
- not have the heart to do sth
- I let my heart rule my head. =

4 Where do you think these idioms come from? Put them in the correct column below.

- be on the same wavelength
- bite the bullet
- beat a hasty retreat
- take the wind out of sb's sails
- be in the saddle
- get your wires crossed
- learn the ropes
- keep a tight rein on sth/sb

Ships and sailing	Radio and telecommunications	Horse riding	Weapons and war

5 Thinking about the literal meaning of the idioms in Exercise 4, can you now match the idioms with their metaphorical meanings?

- ▶ *bite the bullet*
- 1 force yourself to do sth unpleasant or difficult that you have been avoiding.
- 2 be in a position of control or responsibility.
- 3 learn how to do a particular job.
- 4 think in a similar way.
- 5 go away quickly from an unpleasant place or situation.
- 6 make sb less confident by saying or doing sth unexpected.
- 7 control sth/sb carefully or strictly.
- become confused by what sb is saying because you think they are talking about sth else.

3 Introduction to phrasal verbs

A phrasal verb consists of a base verb and one or two particles (adverbs or prepositions).

MEANING

Some particles extend the meaning of the base verb:

Eat up your supper.¹ ‘Up’ here adds the idea of eating all of something.

Some particles create a new meaning, but still with a connection to the base verb:

Let’s **eat in** this evening.² = eat at home this evening.

Some particles change the meaning of the base verb from literal to figurative:

These big bills are **eating into** my savings.³ = using up my money.

GRAMMAR

Some phrasal verbs are intransitive, i.e. they don’t take an object:

We got **up** early to watch the sun **come up**. = rise.

Many phrasal verbs are transitive, i.e. they take an object. Transitive phrasal verbs are of two types: separable and inseparable. With separable phrasal verbs, the object can usually go before or after the particle; with inseparable phrasal verbs, the object must go after the particle. Dictionaries often show the difference like this:

tear sth up

Here, ‘sth’ comes between the verb and particle. This shows you that the object can go before or after ‘up’:

Don’t **tear up** the letter. / Don’t **tear** the letter **up**. = destroy it by tearing it to pieces.

But note that, if the object is a pronoun, it must go between the verb and particle:

Don’t **tear** **it** **up**. (NOT ~~Don’t tear up it.~~)

There are also a small number of phrasal verbs where the object always goes before the particle:

I **showed** the students **around** the school. (NOT ~~I showed around the students.~~)

take against sb/sth

Here, ‘sb/sth’ comes after the verb and particle. This shows you that the object cannot go between ‘take’ and ‘against’; it must go after the particle:

He **took against** Sam after that. = started to dislike Sam. (NOT ~~He took Sam against.~~)

DIFFERENT FORMS, DIFFERENT MEANINGS

With some phrasal verbs, a difference in grammatical structure indicates a difference in meaning.

The plane put down in a field.	put down (intransitive) land.
1 I’ll put your number down here. 2 The cat had to be put down .	put sth down 1 write sth, especially a name or number, on a piece of paper or a list. 2 (usually passive) kill an old or sick animal with a drug.
Don’t put yourself down so much!	put yourself/sb down criticize yourself or sb else in front of other people.
I put my name down for the day trip to the seaside.	put sb / sb’s name down for sth write sb’s name on a list so that they can take part in sth.
I put her anger down to stress.	put sth down to sth believe sth is caused by sth.

B Being single

Is it fun being single?

- DOZYJOE Yes! You're free – nothing's **holding you back** and no one's nagging you because the dishes **are piling up** in the sink. You can **do as you please** any time, day or night.
- RUDY Not for me. I'm bored and lonely. Yes, you **answer to** no one, but **I'd far sooner** be in a loving relationship. **I'd give anything to** meet the right person.
- BELLA My previous boyfriend **messed me around**; I felt he **let me down** badly, and I was really hurt. Now that I've **finished with** him, the thought of going through the same thing again **doesn't bear thinking about**. I don't want another distressing **break-up**.

8 I can talk about families

A Why do families argue?

What is it about **your own flesh and blood**? I've got two sisters. They used to **fight like cat and dog** when they were kids, and **there's little love lost between them** now. But as soon as an outsider criticizes either of them, they immediately **close ranks** and **turn on** them. It's a bit the same with me and my wife. When we're together we argue, but when we're apart, we're **miserable as sin**. How do you **account for** that? I guess living **on top of** each other doesn't help, and I'm sure we **take** each other **for granted** a lot of the time. But families are strange!

B Being a middle child

Middle child syndrome

Being the middle child of three can **result in** ‘middle-child syndrome’. The firstborn often gets the most attention and **is put on a pedestal**; the last to be born is the baby and tends to **get away with murder**. The middle child, though, can feel neglected, **squeezed out** by their siblings, and **starved of** attention. Some studies **have backed this up**, suggesting that middle children who feel **left out** may **distance themselves from** others and become loners. It is important, therefore, that parents **make a point of lavishing** attention **on** the middle child and praising their achievements. And on the positive side, studies show that the middle child is often more creative and artistic than the others.

9 I can describe my emotions

A An emotional rollercoaster

Since I found out that I was pregnant, I’ve been on an emotional rollercoaster¹: my mood seems to change **for no apparent reason**. One minute I’m **on top of the world**, the next I’m **at the end of my tether**, or **crying my eyes out** at some silly romantic movie. I’m so short-tempered – the slightest thing **winds me up**. A guy in the office was tapping on the radiator earlier, and I just **went off the deep end** and **screamed my head off** at him. Poor man – I have since apologized. B Keeping emotions under control

Dealing with office disputes

As head of department, I have to deal with disputes between employees, and I absolutely cannot **take sides**. I try to involve both parties in the dispute, but ensure that I keep any meeting **on an even keel**. **That's easier said than done**, especially if they're **dying to have a go at** each other. Someone like Zoe, for instance, tends to **rub** her colleagues

A Financial worries

Hi Dad

I spoke to Martin yesterday. He'd be too embarrassed to tell you this, but I think he's **pretty much** living **on the breadline**. Last week he had to **fork out** a lot of money **on** his car, which he badly needs, and next month he'll **be** even **worse off** when his rent goes up. The thing is, I don't think he's got much to **fall back on**. I said I could **lay my hands on** about £200 to help out, but he'll need more than that to **pay off** his debts. I know he desperately wants to **pay his own way**, but would you be willing to **bail him out** just this once, or at least have a word with him - without saying I'd spoken to you? Thanks.

B A successful festival

Glastonbury memories

I'd had my doubts about the weather. Last year, it tipped down all weekend and we got soaked to the skin, and this year wasn't looking promising either; in the end, the rain held off. The festival kicked off with a short set by the Moogs, who went down really well. After that, I wandered around the different stages, at one point stumbling on an amazing performance of jazz dance. I'd heard that Joan Baez had had to pull out, but in fact, she turned up and put on a great show. For me, it was the high point of the weekend.

4 One word is missing in each line of text. Where does it go? Write it at the end.

Last year at the Isle of Wight festival, I'd had my X about whether doubts
 to go or not, but in the end I did, and the rain held for the whole 1
 week. This summer, though, it just down the whole time and I got 2
 fed up with being to the skin all the time. I wandered around with 3
 a friend, and in one corner we suddenly stumbled an incredible band 4
 called 'Engine Room' who were going a storm. A guy next to us 5
 said that their performance had kicked with an amazing version of 6
 'Leila', and the high came when they were joined on stage by 7
 Paul McCartney, who went down pretty too. Watching someone like 8
 him putting a real show is a great experience; I forgot about the rain. 9

22 I can describe a date

Blind Date

A friend of both Luisa and David decided that they might like each other, so arranged for the two of them to meet and have dinner at a restaurant.

Luisa

Preparation: The dress I'd had in mind was perfect, but at the last minute I noticed it had a mark on it so I rushed around trying to find something else, getting all hot and bothered in the process. I was pretty wound up by the time the taxi called for me!

First impressions: David appeared to have bags of confidence and was good fun. And really handsome – I couldn't take my eyes off him.

What was the conversation like? Great. The waitress came several times to take our order – we were chatting away quite happily and it was a long time before we got round to looking at the menu.

Will you meet again? We swapped phone numbers. As far as I could tell, he seemed keen!

David

Preparation: This being a blind date, I wanted to make an impression, but I decided to keep it casual.

First impressions: When Luisa arrived at the restaurant she was a bundle of nerves, and she seemed unhappy about something. But she soon snapped out of it and started to enjoy herself.

What was the conversation like? Fine. Luisa was shy at first but gradually came out of her shell and we talked about our friends, travelling, and the like. In fact, the time just flew by.

Will you meet again? I've got her number, but I don't think romance is on the cards.

I was a bit shocked, because when he picked me all up at the station, he looked a complete mess, and as far as I could tell him, he was still wearing the clothes he'd been gardening in and hadn't got him round to making himself look presentable. But I can say that he had big bags of personality – a bit too much, in fact, because by the time we got to the restaurant, he'd managed to get wind me up with his extreme views on women's rights, equality, and the same like. I can't say that the evening flew well by: time seemed to drag interminably, particularly as Eric chatted himself away while I sat there like a fool. He took me to the station and said he'd like to meet again. At that point I couldn't look at him in the eye because for me another date was not on the playing cards. What a relief to get home!

25 I can describe a football match

A How the media saw it

The decision by the Liverpool manager to leave key players **on the bench** and **gamble on** youth didn't **pay off** at Stamford Bridge yesterday. Chelsea **brushed aside** a Liverpool team that was way **below par**, and should have won more easily than the 2-1 score suggests. Lampard and Ballack gave Chelsea a 2-0 lead, and although Liverpool **hit back** in the second half, they were never really **in contention**. With Manchester United's game **rained off** last night, this win means that Chelsea **have gained ground on** the league leaders, but there is still **a long way to go**.

✚ I really enjoyed the weekend. I met some delegates¹ who I didn't **see eye to eye with**, but that's given me plenty of **food for thought**. Thanks from one very satisfied delegate!

✚ I was impressed with the standard of speakers – Jim Rose really **opened** my **eyes** with his talk, and he was brilliant at answering questions **off the cuff**. Plus I got the chance to hear about the latest research, which had been my aim **all along**.

✚ Thank you. You **lined up** some great speakers. I really appreciated the way they **bridged the gap between** theory and practice, and managed to **cater for** all sorts of participants. And the accommodation on the university campus was **second to none**.

— I was disappointed at the lack of opportunity to **bounce ideas off** one another. We needed more time to **feed** our ideas **back** to the organizers while the conference was still going on.

— A couple of events were swapped but we were not told about it, so I **missed out on** Jim Rose's apparently excellent talk. Instead, I sat through a terrible talk in the Great Hall where the speaker really didn't **know his stuff**. And we needed wireless facility – it would be worth **bearing in mind** for next year.

47 I can talk about decision-making

A Decision-making styles

People make decisions in different ways. Some **weigh up** their options carefully, which is sensible as long as you don't **lose sight of** what's important. Others, **rightly or wrongly**, just follow their **gut feeling**. A surprising number **go for** the first available option and **rush into** a decision, regardless of its importance. People who don't trust

their own judgement may **turn to** others, or **go with** the majority view, while those who **have a mind of their own** may not consult anyone at all. Then, of course, there are people who either **lack the courage of their convictions**, or worry so much about making the 'wrong' decision, that they can't make any decision.

The majority of phrasal verbs are either neutral or informal in style. A small number of prepositional verbs, however, range from neutral to formal, and are used more commonly in written English or more formal spoken English. In most cases, this is because the base verb is more formal, e.g. *allude*, *engage*, etc.

Idioms – some interesting histories

How did English idioms come into use? Here we show the meanings behind some idioms, and how some of them developed.

beat about the bush (Unit 35)

This phrase refers to a technique used for hunting. Some hunters in the forest beat the trees or bushes to scare the birds or animals, which were then shot by other hunters as they tried to escape. **Beating about the bush** was therefore a preparation for catching the birds or animals, but without actually achieving it. If people **beat about the bush**, they keep talking, but without getting to the main point.

be in the doldrums (Unit 18)

The **doldrums** is a 19th-century expression meaning a state of inactivity or laziness. Sailors used it to refer to certain areas of the ocean near the Equator where lack of wind made it difficult to sail. A business that is **in the doldrums** is not doing well.

drive a wedge between people (Unit 7)

A **wedge** is a piece of wood or metal with one thin end and one thick end; you use it to keep two things apart or to split wood. If you **drive a wedge between** two people, you make them start disliking or feeling suspicious of each other.

in a rut (Unit 57)

A **rut** is a deep track made by a wheel in muddy ground which it is then difficult to get the vehicle out of. If you are **in a rut**, you are living or working in a situation that never changes.

quick/slow off the mark (Unit 30)

In athletics, the **mark** is the starting point in a race, or the line that indicates it, so someone who is **quick off the mark** makes a quick start. You can also describe someone as being **quick** or **slow off the mark** when they are quick or slow in responding to a situation.

rest on your laurels (Unit 19)

Laurel leaves were used in Roman times to make a crown for the winner of a race or competition. If you **rest on your laurels**, you enjoy your success, but stop trying to improve your performance.
